

4 Inch Weco 206 Pipe Skid

Description

The PRS 4 inch pipe skid is especially designed for the temporary connection between the PRS-ethylene filter and the system of the client. The work pressure of the skid is 140 bar(g), the couplings are WECO wing union fig. 206 with a maximal working pressure of 140 bar(g). The skid is tested annually and comes with a certificate of acceptance (in date).

Technical data Piping and elbows:

Working Pressure : 140 bar(g)
Test Pressure : 210 bar(g)
Length: : 1 - 3 mtr

Technical data Weco wing union fig. 206 Coupling:

Working Pressure : 140 bar(g)
Test Pressure : 210 bar(g)

Typical set-up of pipe skid
